

Report on short term scientific missions

In 4.5 years of Bioneca Cost Action existence (2017-2021), our members were successfully involved in 103 short term scientific missions. This number is even more valuable when taking in account that for almost two years Sars-Cov2 pandemics impaired travels.

We are proud to report that 57% of those travels were performed by early career investigators and that 45% of travels were awarded to Inclusiveness Target Countries. Ratio of M/F missions was 63%/37%.

Total number of STSMs	Female STSM awardees	ECIs (Early Career Investigators)	Awardees coming from an Inclusiveness Target Country (ITC)
103	38 (= 36,89 %)	59 (= 57,28 %)	46 (= 44,66 %)
